

Top Host 2026

LinkedIn post | Graphic + accompanying copy

One campaign. One recognizable character. A practical example of what we're building through AI Media & Training Services.

For my Top Host 2026 promotion, we adapted my existing Hair-on-Fire character into a campaign graphic, paired it with social copy and a spoken script, and outlined a short video storyboard.

This is the kind of work I want AMTS to make understandable: how to take an idea, organize the materials, direct the creative process, review the result, and turn it into something useful. The graphic and copy are prepared; the video is still planned.

If you're working on a promotion, teaching resource, or business presentation, I'd welcome a conversation about creating it together or learning the process.

And if you'd like to support my Top Host campaign, please vote for me today:
